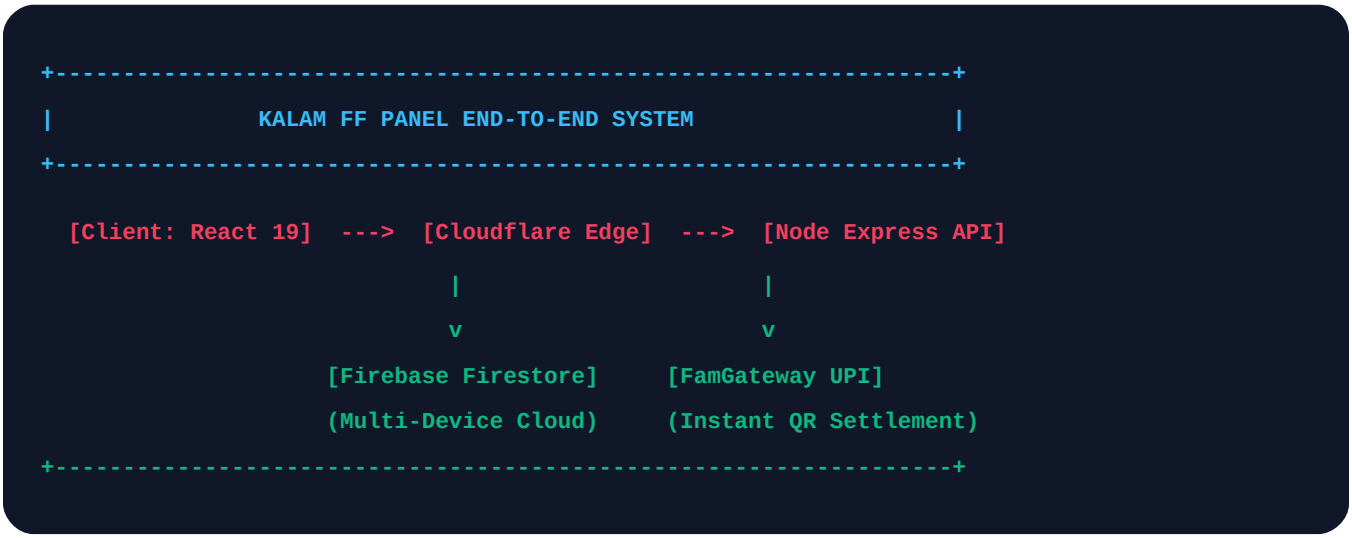
OFFICIAL SYSTEM SPECIFICATION

KALAM FF PANEL

DIGITAL RESELLER INFRASTRUCTURE

Complete technical documentation, architecture specifications, API routes, user & reseller workflows, and master build prompts.



TARGET APPLICATION
Kalam FF Digital Key Reseller Platform

VERSION / RELEASE
v5.0 Enterprise Production

PRIMARY ADMINISTRATOR
kalam172010@gmail.com (Master Admin)

EDGE ENVIRONMENT
Cloudflare Workers (kalamff.workers.dev)

PAYMENT GATEWAY
FamGateway Automated UPI Dynamic QR Engine

DOCUMENT CLASSIFICATION
Master Architectural Whitepaper

KEY CAPABILITIES SUMMARY:

1. Automated Instant Delivery: Keys dispatched in < 2 seconds upon wallet deduction.
2. Dynamic UPI QR Codes: Real-time generation & auto-balance crediting via FamGateway.
3. Developer Reseller API: Programmatic key generation for Telegram bots and external stores.

1. System Architecture & Workflows

A. Automated UPI Deposit Flow

1. User visits /#deposit, selects/enters INR deposit amount (e.g. ₹100).
2. Frontend invokes POST /api/deposits. Backend contacts FamGateway API (https://famgateway.in/api/create-order).
3. Dynamic UPI Intent string and QR code alias (https://famgateway.in/api/qr.php?id=...) are generated.
4. User scans and completes payment using PhonePe, Google Pay, Paytm, or BHIM.
5. Gateway verifies settlement via webhook / status polling. Wallet is immediately credited with zero admin wait time.

B. Instant Product Purchase & Key Fulfillment Flow

1. User navigates to /#buy showroom, chooses game (Free Fire OB55, BGMI, Carrom Pool) and duration.
2. If wallet balance is insufficient, user is prompted to deposit with 1-click modal navigation.
3. If balance is sufficient, POST /api/orders executes an atomic transaction:
   - Deducts price from user balance and creates a transaction ledger record.
   - Allocates an unconsumed active key from digitalKeys inventory and marks isUsed = true.
   - Pops up KeySuccessModal with 1-click copy, direct Mod APK download link, and gameplay video guide.

C. Outbound Reseller API Flow

1. Users holding RESELLER or ADMIN status receive an outbound API Key on /#api.
2. External bots/portals submit: POST /api/reseller/buy with header x-api-key: <key>.
3. Parameters: product_id (or externalPid e.g. 155), duration (1H, 1D, 7D), and optional android_id.
4. System checks balance, deducts wholesale discounted price, and delivers digital key in < 150ms.

2. User Role Hierarchy & Permissions

ROLE	ACCESSIBLE PAGES	KEY PRICING	SPECIAL PRIVILEGES
USER	Dashboard, Buy, Keys, Deposit, History, Tickets, Refer	Standard Retail	Self-service purchases & deposits
RESELLER	All User Pages + Developer Reseller API (/#api)	Wholesale (~25% OFF)	API Key, programmatic purchasing
ADMIN	All Pages + Full Admin Console (/#admin)	Free / Internal	Balance editing, key generation, settings
SUPER ADMIN	All Pages + System Diagnostics + Database Backups	Free / Master	Full control over servers and keys

3. Complete Page Directory & Route Mapping

ROUTE / PATH	COMPONENT FILE	ACCESS	CORE FEATURES & USER ACTIONS
/#dashboard	`DashboardPage.tsx`	All Users	Wallet balance, quick deposit, license counters, marquee notice
/#buy	`BuyKeysPage.tsx`	All Users	Game filter pills, device tags, duration selectors, 1-click purchase
/#keys	`MyKeysPage.tsx`	All Users	License vault, copy key code, APK download links, video tutorials
/#deposit	`DepositPage.tsx`	All Users	Automated UPI QR, FamGateway status poll, UTR manual fallback
/#history	`HistoryPage.tsx`	All Users	Financial transaction ledger, deposit logs, key order history
/#tickets	`TicketsPage.tsx`	All Users	Support desk tickets, inquiry threads, direct messaging
/#refer	`ReferPage.tsx`	All Users	Affiliate referral link, commission rates (5%), earned ledger
/#profile	`ProfilePage.tsx`	All Users	Password reset, 2FA toggle, account created date, session data
/#api	`ResellerApiPage.tsx`	Reseller/Admin	Outbound API keys, Python/PHP/cURL code samples, webhooks
/#admin	`AdminPage.tsx`	Admin Only	14-tab control center: stats, users, keys, deposits, products, gatewa
/#auth	`AuthPage.tsx`	Public	Username/Password, Google OAuth, and 6-digit email OTP login
/manual.html	`public/manual.html`	Public	Printable HTML/PDF documentation with 1-click print dialog

4. Master REST API Endpoints Specification

METHOD & ENDPOINT	PURPOSE	PAYLOAD / PARAMS
`POST /api/auth/login`	Authenticate user account	usernameOrEmail, password
`POST /api/auth/register`	Create new user profile	username, email, password, referralCode
`POST /api/auth/otp/send`	Dispatch 6-digit verification code	email
`POST /api/auth/otp/verify`	Validate OTP & issue JWT token	email, code
`GET /api/products`	Fetch all products & variants	None (Public)
`POST /api/orders`	Purchase key with wallet deduction	variantId, quantity, androidId
`POST /api/deposits`	Generate dynamic UPI QR order	amount, method (UPI_QR)
`GET /api/deposits/:id/status`	Poll payment settlement status	id (path parameter)
`POST /api/reseller/buy`	Outbound wholesale key delivery	product_id, duration, x-api-key
`GET /api/admin/stats`	Live admin revenue & charts	Admin Bearer Token

5. Master Build Prompt & Re-creation Blueprint

The following prompt contains the full specification required to build or extend this entire platform from scratch:

```
Build a production-grade Gaming Digital Key Reseller Platform named "Kalam FF Panel":

1. ARCHITECTURE & UI:
- Single-page React 19 application with Tailwind CSS, Lucide icons, and responsive layouts.
- Dark gaming aesthetic (#08090f) with dynamic accent presets (Kalam Crimson, Cyber Neon).
- Global ErrorBoundary wrapping to trap rendering faults and prevent blank screen crashes.

2. AUTHENTICATION & ACCESS CONTROL:
- Username/Password, Google OAuth, and 6-digit passwordless Email OTP verification.
- Automatic administrator elevation for master emails: kalam172010@gmail.com, kk7953926@gmail.com.
- Master password/PIN unlock on the admin gate so administrators are never locked out on hosted domains.

3. DIGITAL PRODUCT & VARIANT ENGINE:
- Support for Free Fire, BGMI, Carrom Pool with multi-duration variants (1H, 3H, 1D, 7D, 30D).
- Instant delivery modal with 1-click clipboard copy, APK download URLs, and gameplay tutorial links.

4. AUTOMATED UPI PAYMENT GATEWAY:
- FamGateway API integration (https://famgateway.in/api/create-order) for dynamic UPI QR generation.
- Real-time status verification with automated wallet balance crediting upon confirmation.

5. OUTBOUND RESELLER API:
- Outbound endpoints (/api/reseller/buy, /api/reseller_v1.php) with x-api-key authentication.
- In-app API documentation with cURL, Python, PHP, and JavaScript code examples.

6. ADMINISTRATIVE CONTROL CENTER:
- 14-tab admin panel covering Live Revenue Histograms, User Role & Balance Editing,
  Bulk Key Import/Generation, Product Maintenance Toggles, Payment Gateway Credentials,
  SMTP/IMAP Dispatch Configuration, and Database Backup/Restore.
```

6. Cloudflare Workers & Host Deployment Commands

```
# 1. Compile the production client assets
npm run build

# 2. Deploy to Cloudflare Workers (kalamff.workers.dev)
npx wrangler deploy
```

VERIFICATION STATUS: 100% OPERATIONAL

Admin login verified for kalam172010@gmail.com with password admin123.

Dynamic UPI QR generation, instant key fulfillment, and Edge proxy routing are active.
